Dan says the modeling files consist of the model input file, the output file, and the meteorological data file. None contain CBI.

He also said the dispersion model, AERMOD, is a public domain model.

I'll still review it all before we send it.

John:

What is in the modelling file? is there confidential information about the model? I think we should share the results and our inputs and assumptions with USG. Is there correspondence between dan and you?

Subject: USG NAAQS violation

Eric and Mony-

USG responded to our NOV, and asked for our modeling files. Dan initially didn't want to send them, but I pointed out that we would have to turn them over under the Admin Hearing process. Plus USG is insisting on reviewing them to talk resolution.

I don't have a problem turning them over, but wanted to check with both of you first.

Thanks.

John
